**Comfortable:** DevTool & Debugging | ExpressJS | Rest APIs | JWT | SCSS | Prompt Engineering

**Familiar:** NodeJS | Google Map

**Tools:** VS Code | Netlify | Vercel | Railway | Surge | Dotenv | Figma | Canva

## PROJECTS

### AthelteX.com (A Course Enrollment Platform)

[Live Link](#) | [GitHub](#) > [Client](#) | [Server](#)

AthleteX.com is a SPA with **3 user roles & payment system** using MERN Stack -

- The student dashboard provides personalized access for students to browse and book athlete classes for their summer vacations. They can view their enrolled classes and payment history.
- Instructors have dedicated tools to efficiently add and manage their classes and The admin role holds ultimate control through an admin control panel, managing user roles, and approving or denying class requests.
- Implemented payment system and real-time data changes after payment.

**Technologies used:** React.js, TailwindCSS, DaisyUI, Firebase, NodeJS, ExpressJS, MongoDB

### Kiddu.com (A Vibrant Toy Marketplace for Kids)

[Live Link](#) | [GitHub](#) > [Client](#) | [Server](#)

Kiddu.com is a SPA using MERN stack -

- Used two user roles buyer and seller. Buyer and Seller are controlled with a private route.
- Seller can add their products, see all products, see their own products, update their products and delete their products. On the other hand buyers can just view toy details from anywhere.
- The website is responsive for mobile and larger devices like laptops and desktops.

**Technologies used:** React.js, TailwindCSS, DaisyUI, Firebase, NodeJS, ExpressJS, MongoDB
